Professional Summary

Full-Stack Software Engineer building production web applications, RESTful APIs, and cloud-based solutions. Experienced with React/Next.js, Vue/Nuxt, Python/Django, and Node.js/NestJS, with PostgreSQL and Redis for data and caching. Integrates third-party APIs and AI/LLM services, and contributes to Docker-based delivery, GitHub Actions, and AWS deployment.

Work Experience

Mar 2024 – Present

Accra, Ghana

Front-End Engineer

Hubtel Limited

- Build responsive Vue/Nuxt interfaces for lenders, agencies, financiers, and merchant customers across production credit-data and payment platforms.
- Deliver frontend and backend features for the Agency Portal, integrating user workflows with APIs and supporting services.
- Collaborate across frontend and backend teams on authentication, payment integrations, access controls, automated testing, and Azure DevOps releases.

Apr 2023 – Oct 2023

Remote, US

Software Engineer

Zerotech Agency

- Developed RESTful APIs with Node.js/NestJS and Python/Django, and responsive React/Next.js dashboards using Material UI.
- Integrated Twilio and AWS SES APIs for communications, with Redis supporting application workflows.
- Contributed to microservice design, PostgreSQL-backed services, and CI/CD workflows using GitHub Actions, Docker, AWS, and Terraform.

Oct 2021 – Nov 2022

Cape Coast, Ghana

Software Engineer

University of Cape Coast

- Built internal administration portals with Laravel, Jetstream, Tailwind CSS, and Alpine.js during national service.
- Automated reporting and approval workflows, analyzed student issues with Python, and supported digitization of student records.

Education

Aug 2017 – Sep 2021

Cape Coast, Ghana

B.Sc. Information Technology

University of Cape Coast

May 2022 – Oct 2023

Software Engineering Program

ALX

Projects

Lenders Portal

Credit Data Management and Reporting Platform

- Built frontend workflows for a platform that enables lenders to submit credit data to MyCreditScore Bureau and access credit reports for individuals and businesses.
- Implemented borrower search, identity and credit-report views, dashboard totals, and non-performing loan ratio displays.
- Developed CSV upload flows with templates and error feedback, transaction and repayment views, and trusted-lender access states.

Agency Backoffice

Agency Operations Portal for the Credit Data Platform

- Delivered frontend and backend features for the Agency Portal, connecting agency workflows with APIs and supporting services.
- Integrated portal interfaces with backend functionality within the wider credit-data platform.

PaySmallSmall Backoffice

Financier and Internal Portals for Digital Payments and Overdrafts

- Built backoffice applications for both financiers and Hubtel internal operations teams supporting PaySmallSmall, a digital payment and overdraft solution for Albrim Microfinance.
- Delivered portal interfaces for the two user groups, integrating the applications with the product's supporting services.

Merchant Invoicing Platform

Customer Invoice Payment and Receipt Portal

- Built Nuxt 3 and Vue 3 invoice listing, detail, payment-status, and receipt experiences for Hubtel merchant customers.
- Implemented Google and Microsoft OAuth flows, secure sessions across tenant subdomains, and authentication and bot-protection checks.
- Integrated card-payment workflows with OTP/3DS verification and Hubtel Unified Checkout, enabling customers to pay invoices and retrieve receipts.

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL, PHP

Frontend: React, Next.js, Vue.js, Nuxt.js, Tailwind CSS, Material UI

Backend and Data: Node.js, NestJS, Python, Django, FastAPI, RESTful APIs, microservices, PostgreSQL, Redis, MongoDB

Cloud and Delivery: AWS, Docker, GitHub Actions, CI/CD, Azure DevOps, Terraform, Vitest, Playwright, Datadog

AI and Integrations: OpenAI API, Claude API, LLM integration, third-party APIs

AI Workflow and Productivity Skills

Prompt Engineering: Translate requirements into clear prompts with codebase context, constraints, and acceptance criteria.

Repository-Aware Agents: Use coding agents to inspect repositories, explain implementations, and support development tasks.

AI-Assisted Development: Use AI to prototype features, scaffold code, and refine implementations through iterative feedback.

Debugging and Code Review: Use AI to investigate errors, review code, and suggest fixes, checking outputs against project requirements.

Certifications and Professional Development

AWS Certified Cloud Practitioner • Amalitech AWS re/Start Program • Amalitech Graduate Engineer Program
