SUMMARY

Full-Stack Software Engineer with 4+ years of experience delivering enterprise financial platforms, responsive web applications, scalable APIs, and cloud-native systems. Skilled in TypeScript, JavaScript, Python, Next.js, Nuxt.js, NestJS, Django, PostgreSQL, AWS, Docker, and CI/CD, with experience integrating third-party services, AI-powered applications, and data workflows.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, PHP

Frontend: Next.js, Nuxt.js, React, Tailwind CSS, Bootstrap, Material UI, Alpine.js

Backend & APIs: NestJS, Django, FastAPI, Laravel, tRPC, REST APIs, microservices

AI & Data: OpenAI API, Claude API, prompt engineering, AI agents, RAG, LLM integration, PostgreSQL, MongoDB, MariaDB, Redis, ClickHouse

Cloud & DevOps: AWS, Cognito, S3, CloudFront, Docker, GitHub Actions, Azure DevOps, CI/CD, Bash, Terraform, Datadog

PROFESSIONAL EXPERIENCE

Front-End Engineer | Hubtel Limited | Accra, Ghana | Mar 2024 – Present

- Delivered Lenders and Agency portals supporting credit-data and lending workflows for banks and microfinance institutions.
- Built PaySmallSmall portals and back-office applications for financiers and internal operations teams.
- Integrated AWS Cognito, S3, and CloudFront for authentication, secure file uploads, and resilient content delivery.
- Implemented financial-data validation, audit logging, encrypted transmission, and ClickHouse analytics integrations.
- Improved release reliability through Playwright testing, Datadog monitoring, and Azure DevOps delivery workflows.

Software Engineer | Zerotech Agency | US Remote | Apr 2023 – Oct 2023

- Developed scalable backend services and REST APIs with NestJS and Django for business applications.
- Engineered responsive admin dashboards with Next.js and Material UI to improve operational data access.
- Integrated Twilio, AWS SES, and Redis to automate communications and application workflows.
- Contributed to microservice design and optimized PostgreSQL-backed services for reliability and maintainability.
- Automated build and deployment pipelines with GitHub Actions, Docker, AWS, and Terraform.

Software Engineer | University of Cape Coast | Cape Coast, Ghana | Oct 2021 – Nov 2022

- Designed and maintained internal admin portals using Laravel, Jetstream, Tailwind CSS, and Alpine.js.
- Automated reporting and approval workflows to reduce manual processing across administrative teams.
- Used Python to analyze reported student issues and support data-informed operational decisions.
- Collaborated with academic and records teams to digitize student-record processes.

SELECTED PROJECTS

Merchant Invoicing Platform

- Built a portal that enables customers to pay invoices and subscriptions owed to businesses.
- Developed REST APIs and PostgreSQL-backed workflows for invoices, subscriptions, payments, and notifications.
- Used Redis, Docker, AWS, and CI/CD pipelines to support reliable processing and deployment.

LendScore Digital Lending Platform

- Delivered enterprise portals supporting lenders, agencies, financiers, and internal operations teams.
- Implemented secure AWS authentication, file uploads, financial-data validation, and analytics workflows.
- Strengthened quality and observability with Playwright, Datadog, ClickHouse, and Azure DevOps.

EDUCATION & CERTIFICATIONS

B.Sc. Information Technology — University of Cape Coast | Aug 2017 – Sep 2021

ALX Software Engineering Program | May 2021 – Nov 2022

AWS Certified Cloud Practitioner | Amalitech AWS re/Start Program | Amalitech Graduate Engineer
